

THE EVEN KEEL

Volume 5 *Builder's News*

March 1998

SABRE 452

The new SABRE 452 will carry you to the ends of the earth in comfort and safety, with a style and grace that no other bluewater yacht can offer. And she'll call on the SABRE heritage of performance cruising to get you there well ahead of the others.

SABRE 452

Specifications

LOA.....45'2"
LWL.....38'4"
Beam.....14'1"

Bulb Wing Keel

Draft.....5'6"

Standard Fin Keel

Draft.....7'9"
Displacement.....26,500lbs.
Ballast.....10,200lbs.

Designed by Boat of the Year Award winning collaboration of the Sabre Design Team and Jim Taylor Yacht Design, the Sabre 452 is the new flagship of the Sabre Fleet. She has been thought out to the smallest detail, with your safety, comfort and confidence at the forefront of every design and engineering decision.

&Mac221;&Mac221;&Mac221;

Literally hundreds of innovative ideas and details, many gathered from discussions with over 2,000 Sabre owners, have been incorporated into this magnificent design.

One of the features offered by Sabre in their yacht construction is personalization of the design to meet the individual sailor's needs.

MARSKEEL TECHNOLOGY produces two keel options. The Standard Fin Keel has a draft of 7'9" while the Bulb Wing Keel's draft is 5'6". The Bulb Wing Keel has a 'bulb' type head that transforms to an aft wing. The stainless steel welded keel cage is cast in antimonial lead and silicon bronze fasteners are used for attachment.

Another unique option available is the choice of either a traditional or step transom. These are just two examples of how Sabre sailors may order it their way.

With the design of the Sabre 402 in 1996, Sabre chose to use a carbon fibre rudder stock in place of stainless steel. This lowered the weight by 120 lbs., reducing the weight to the aft of the boat, lessening pitching while bluewater cruising. The hull is 3/4" balsa sandwich core which provides superior stiffness, and sonic and thermal insulation as well. The 452 utilizes the finest hardware and fittings that will provide years of sailing performance on extended cruises or day sailing. Just ask those 2,000+&Mac221; Sabre owners worldwide!
